### DETAILED ACTION

This office action is in response to an After Final Amendment filed 10/20/2004.

The allowable subject matter of claim 10, as stated in the previous office action, is withdrawn.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Bae (US 5,563,747).

Regarding claim 10, Bae teaches controlling a capstan (see col. 1, ln. 63) in a video tape recorder (see col. 1, ln. 38-col. 2, ln. 8), the capstan being driven by a motor and drawing (see figure 3) a tape from which a video signal is reproduced, a control pulse sensor (see element 10 in figure 3) detecting control pulses of the tape, including the following successive steps: rotating the capstan in a first direction (see col. 3, ln. 27-40); detecting a control pulse by the control pulse sensor and after a first predetermined period of time has elapsed (see col. 3, ln. 40-45); applying a torque to the capstan in a second direction opposite the first direction for a second predetermined period of time (see col. 3, ln. 46-59); applying a torque to the capstan in the first direction for a third predetermined period of time (see col. 4, ln. 33-45); and, nullifying the motor current (see col. 3, ln. 60-col. 4, ln. 8).

*Allowable Subject Matter*

Claims 11-16 are allowed. The reasons for allowance are given the previous office action.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takayama (US 5,523,895) is cited for a recording and reproducing apparatus. Sakaguchi et al. (US 5,313,344) is cited for stand-by mode setting/releasing device for videocassette recorder.
